EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE**REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance: One reason for allowance is that the prior art of record does not show the combination of a securing means for securing a portion of a sheet material to a rotatable plate and a rotatable releasable clamp. Furthermore, this is not shown in conjunction with means to return the sheet to one of the first rotation position and second rotation position to form an additional folded portion. Delachartre does not show a securing means and means for returning the sheet to one of the first rotational position and the second rotation position to form an additional folded portion. Delachartre only shows a clamp at A without a securing means. Delachartre shows that the rotatable plate B and clamp A can be rotated to second rotational position (Figure 5) from a first rotational position (Figure 4) to fold the sheet material but does not show that a means returns the sheet to one of the first and second rotational positions "to form an additional folded portion". As to the insufficiency holding applied against the claims and specification, it is maintained that applicant has overcome these objections in the remarks in response to the first Office Action. In this regard, applicant has pointed out that the securing means is disclosed as a vacuum plate, that the repositioning means is schematically shown at element 36 in the Figures and is clearly an element which is known to the skilled artisan and that the removing means is disclosed at the paragraph bridging pages 13 and 14 in the original disclosure. Accordingly, the specification and claims are deemed to be sufficiently disclosed to the skilled artisan.
